PROJECTS

Pro-Connect ↗
Aug 2025 - Sep 2025

Built a professional networking web application (Pro-Connect) to connect professionals. Implemented secure authentication & authorization for protected user access. Developed real-time messaging using Socket.io to enable instant, reliable chat between users. Created a connection & request system to send, accept, and manage professional invites and connections. Designed profile management features allowing users to update personal details and upload profile pictures. Added a one-click profile export tool to download a user's full profile data as a single file.

WonderLust ↗
May 2025 - Jul 2025

Built a hotel booking platform allowing users to Create, View, Edit, and Delete listings. Implemented user authentication and integrated image upload functionality using Cloudinary. Managed async operations, error handling, and form validation for smooth user experience
